## Lighting Consultants

Spiers & Major, Edinburgh, U.K.

## Landscape Architects

Cracknell

## General Contractor

HMR (Habtoor Murray & Roberts)

## Water Feature Design, Manufacture & Programming

Crystal Fountains

## Features

18 unique water features:

---

3 Exterior

---

15 Interior

---

Located in the heart of Dubai, the BurJuman Centre is a distinctive retail landmark comprising 2.8 million square feet of space (800,000 square feet of retail space). With more than 300 prestigious stores, including the main anchor of Saks Fifth Avenue, BurJuman is considered "the world's most luxurious shopping destination".

## Design Challenge

A testament to Crystal Fountains versatility, 18 unique and structurally complex fountain experiences were created within very small footprints.

Interpreting the creative expression of the retail designer, Crystal Fountains used materials such as sculpted marble, onyx, stainless steel and granite and used a multitude of water feature effects – clear streams, water walls, cascades, lily ponds, water under glass, sequenced water effects, laminar streams and misting effects.

The culminating experience creates a truly impressive collection of water features that echos the intricacy and sophistication of the surrounding architecture.
