Features

93 LED120 Choreoswitches™ with built-in LED lights

30 fog nozzles incorporated with Choreoswitches™

TOWN LAKE in Austin, Texas, is part of the redevelopment of a 25 acre public park in the heart of downtown. Opened in 2007, the project has already been awarded Best City Beautification and Best Neighborhood Gift to Austin (BEST OF AUSTIN AWARDS 2007).

At the center of the Town Lake area is a 6,100 sq. ft (566 sq. metre) 'dry plaza' fountain created in a dramatic spiral of 93 programmable Choreoswitches™ by Crystal Fountains. Jets of water are choreographed to appear at different heights, in different spots, and at different times of day.

The Design Challenge:

To extend the entertainment value, all water feature components are programmable and the choreography was designed to appeal to the most common park users. For joggers and mothers with small children, morning shows are quieter. Day shows showcase a fun array of bursting jets, and evening shows with an LED light show only, then fog effects followed by fun active shows combining water and lighting.

Close to 200 of Crystal Fountains new technology LED lights created the night-time displays in a virtually endless variety of colors. (See image on front of this card)

About Crystal Fountains
